Exercise: Mapping the AI Tech Stack to Your Domain

Objective:

In your domain group (Risk Management, Insurance & Reinsurance & HR Consulting), map each layer of the AI Tech Stack to concrete tools, processes, or artifacts you'd need—then share back with the coach.

---

1. **Form domain teams**

   o   Team A: Risk Management

   o   Team B: Insurance & Reinsurance

   o   Team C: Human Resource Consulting

2. **Complete the mapping table**

   For each **AI Tech Stack layer**, identify **1–2 domain-specific items** (tools, workflows, policies, KPIs, etc.).

🖊 Layer	⛰ Your Domain Mapping
Business Layer	
Agentic Layer	
Compliance Layer	
Security Layer	
Data Acquisition Layer	
Data Processing Layer	
Model Layer	
Infrastructure Layer	

3. **Discuss & Debrief** (10 min)

   o   Which layers were easiest or hardest to map?

   o   What gaps or dependencies did you uncover?

   o   How will this mapping inform your next AI initiative?
